

Outcomes

2016 Average Length of Stay – 78 Days

2015 Average Length of Stay – 67.5 Days

Brief overview:

The YOQ has become the standard in measuring therapeutic change during the treatment process. The self-report measures therapeutic progress in six different areas:

- Intrapersonal Distress
- Somatic
- Interpersonal Relationships
- Social Problems
- Behavioral Dysfunction
- Critical Items

High scores indicate greater levels of dysfunction. A score of less than 47 is considered "normal."

- Average Second Nature student scores upon intake = 100
- Average Second Nature student scores upon discharge = 41
- Average Second Nature student scores after 6 months = 31
- Average Second Nature student scores after 6 months = 35
